display

color

Sets the text color of an element.

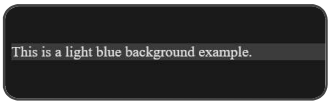
```
p {
    color: red;
}
```

More info: W3C color property

background-color

Sets the background color of an element.

```
div {
    background-color: lightblue;
}
```



More info: W3C background-color

margin

Sets the outer space of an element.

```
div {
    margin: 20px;
}
```

Note: *Background color and border added to better visualize the margin effect.*

More info: W3C margin property

padding

Sets the inner space between content and border.

```
div {
    padding: 15px;
}
```

Note: *Background color and border added to better visualize the margin effect.*

More info: W3C padding property

display

Defines how an element is displayed in the layout.

```
div {
    display: inline-block;
}
```

More info: W3C display property
